

What is claimed is:

1 1. A cellular phone holding set comprising:

2 a first part pivotally connected to a second part, a speaker received  
3 in an inner periphery of said first part and a holding device located between  
4 said first part and said second part, and

5 a base and said second part pivotally connected on a top of said  
6 base.

1 2. The holding set as claimed in claim 1, wherein said second part has two  
2 hollow lugs and said first part has two rods, said two rods movably retained  
3 in said two hollow lugs.

1 3. The holding set as claimed in claim 1, wherein said first part has a plurality  
2 of apertures defined therethrough.

1 4. The holding set as claimed in claim 1, further comprising a block connected  
2 to said first part and said block having an engaging plate, said holding  
3 device including a base board with two clamping members extending from  
4 said base board, a box connected to said base board and having a groove  
5 defined therein, said engaging plate movably received in said groove.

1 5. The holding set as claimed in claim 1, further comprising an inner wall in  
2 said second part and a space defined between said inner wall and an inner  
3 periphery of said second part, a through hole defined through said second  
4 part and communicating with said space.

1 6. The holding set as claimed in claim 5, wherein a wire hole defined through  
2 said inner wall and communicates with said space and an interior of said  
3 second part.
